- Coin Diameter: 50.8 mm
- Coin Denomination: \$2
- Year of Issue: 2016
- Coin Mintage: 7,500
- Country of Issue: Fiji

### **Coin Story**

Captain America's trusty shield has become a fixture of Marvel lore and a globally recognized icon. For 75 years now, the simple red, white, and blue shield has always been at the First Avenger's side. The shield debuted alongside Cap in 1941 and was encased in arctic ice with him until he was rediscovered in the modern era. Like the Super-Soldier Steve Rogers himself, the shield is one-of-a-kind. Constructed from a vibranium-metal alloy that has never been duplicated, Cap's shield is virtually indestructible. A wonder of engineering, the shield has great aerodynamic properties: it is able to slice through the air with minimal wind resistance and deflection of path. Its overall resilience, combined with its natural concentric design, enable it to rebound from objects with minimal loss of angular momentum and absorb massive impacts without sustaining damage.

Your coin is the world's first two-ounce, 99.9% pure silver, shield-shaped coin! A spot-on, legal tender replica of Captain America's legendary, vibranium-alloy shield.
